UNIVERSITY CURRICULUM COMMITTEE – 2009-2010
Mr. David E. Shipley, Chair
Agricultural and Environmental Sciences - Dr. Timothy L. Foutz
Arts and Sciences - Dr. Roxanne Eberle (Arts)
                      Dr. Rodney Mauricio (Sciences)
Business - Dr. James S. Linck
Ecology - Dr. James W. Porter
Education - Dr. Yvette Q. Getch
Environment and Design - Mr. Scott S. Weinberg
Family and Consumer Sciences - Dr. Jan M. Hathcote
Forestry and Natural Resources - Dr. Sarah F. Covert
Journalism and Mass Communication - Dr. Wendy A. Macias
Law – No representative
Pharmacy - Dr. Keith N. Herist
Public and International Affairs - Dr. Jerome S. Legge
Public Health – Dr. Phaethra S. Corso
Social Work - Dr. Patricia M. Reeves
Veterinary Medicine - Dr. K. Paige Carmichael
Graduate School - Dr. Malcolm R. Adams
Undergraduate Student Representative – Cameron Secord
Graduate Student Representative – Lauren King

Dear Colleagues:

The attached proposal to add FANR(ECOL) 1200, Natural History of Georgia, to Area II, Life Sciences, of the General Education Core Curriculum, has been approved by the General Education Subcommittee and will be an agenda item for the February 12, 2010, Full University Curriculum Committee meeting. Complete course objectives and topical outline for this course are available under Browse in the CAPA system.

Sincerely,

[Signature]
David E. Shipley, Chair
University Curriculum Committee

cc: Professor Jere W. Morehead
    Dr. Laura D. Jolly
General Education Curriculum

General Education Core

FANR(ECOL) 1200 - Natural History of Georgia
Course Description: An introduction to the science of natural history and exploration of the flora and fauna of the natural habitats of Georgia. Students will gain familiarity with the geography, geology, plant communities, and animals (focusing on vertebrates) of the three geographic regions of Georgia: Appalachians, Piedmont, and Coastal Plain as well as our coastal environments.
View complete course information in CAPA

II. Sciences (7-8 hours)
Scientific reasoning will be characterized by knowledge and application competencies in scientific method, laboratory techniques, mathematical principles, and experimental design to natural phenomena. Study of the Sciences will ensure that students gain an understanding of the natural, scientific and technologically - oriented world of which they are a part, and that they be able to engage critically and ethically with future scientific innovation.

Life Sciences (3-4 hours)
- Ability to understand basic scientific principles, theories, and laws as they apply to scientific disciplines
- Ability to discern the role in and impact of science on society, and to identify and properly use appropriate technologies for scientific inquiry
- Ability to understand how living systems function and the relationship amongst living organisms in the environment, and to apply societal ethics to scientific inquiry in the life sciences

The course begins with a discussion of the formation of Georgia’s geologic features and landforms. As part of this development, we describe our understanding of continental drift and the theory of plate tectonics. This becomes the basis for discussion of how scientific theory develops and the role of scientific argument. The course continues with detailed discussion of the habitats of Georgia and the relationships among the food resource, plant and animal communities.
