UNIVERSITY CURRICULUM COMMITTEE – 2014-2015
Dr. William K. Vencill, Chair
Agricultural and Environmental Sciences - Dr. Robert B. Beckstead
Arts and Sciences - Dr. Roxanne Eberle (Arts)
        Dr. Rodney Mauricio (Sciences)
Business - Dr. Myra L. Moore
Ecology - Dr. James W. Porter
Education - Dr. Seock-Ho Kim
Engineering - Dr. Sidney Thompson
Environment and Design - Mr. David Spooner
Family and Consumer Sciences - Dr. Silvia Giraudo
Forestry and Natural Resources - Dr. John C. Maerz
Journalism and Mass Communication - Dr. Alison F. Alexander
Law - Ms. Elizabeth Weeks Leonard
Pharmacy - Dr. Cory Momany
Public and International Affairs - Dr. Robert Grafstein
Public Health - Dr. Katie D. Hein
Social Work - Dr. Kristina Jaskyte
Veterinary Medicine - Dr. Scott A. Brown
Graduate School - Dr. Timothy L. Foutz
Ex-Officio - Provost Pamela S. Whitten
Undergraduate Student Representative - Mr. William Heaton
Graduate Student Representative - Ms. Lauren E. Mullenbach

Dear Colleagues:

The attached draft of a proposal to create a new Experiential Learning Requirement will be an information item for the January 16, 2015, Full University Curriculum Committee meeting.

Sincerely,

William K. Vencill, Chair
University Curriculum Committee

cc:  Provost Pamela S. Whitten
     Dr. Laura D. Jolly
EXPERIENTIAL LEARNING REQUIREMENT

1. Consideration of proposal

Experiential Learning requirement to be submitted for consideration by University Curriculum Committee, February, 2015

2. Proposed Policy

To succeed, students in the 21st century must be able to tackle real-world problems and use critical thinking and problem solving skills to solve multifaceted problems that do not have simple solutions. Thus, the University of Georgia will require all undergraduate students to engage in hands-on, experiential learning within a domestic or global setting as a graduation requirement.

The university defines experiential learning as the development of knowledge, skills, abilities, values, behaviors, and attitudes via first-hand experiences outside of traditional classroom structures.

Recognizing the diversity of academic programs across the university, the experiential learning requirement may be met in a variety of ways, including through the Center for Undergraduate Research Opportunities (CURO) and other supervised research courses; study-abroad and field school programs; service-learning; internships; and other unique credit or noncredit options.

Each school and college will determine which courses and/or experiences will fulfill the requirement within its academic context, without increasing the hours required for graduation beyond the approved limit. Having once satisfied the Experiential Learning requirement, the student will not have to fulfill it again unless the program requirements for his or her major necessitate additional and/or specific experiential coursework. Each school and college will be responsible for monitoring the compliance of its students to the requirement. The Experiential Learning Requirement will start with students matriculating Fall 2016 and later.

3. Learning Outcomes for University-wide Experiential Learning Requirement

Courses or extracurricular activities that fulfill the requirement should be structured and coordinated with the curriculum; hone the student’s understanding, attitude, behavior, confidence, and sense of responsibility; and challenge the student to engage reflectively with their academic experience. The following learning outcomes are anticipated through the various contexts of the Experiential Learning requirement

A. Graduates who fulfill the requirement through undergraduate research will demonstrate and describe how systematic and in-depth inquiry into a problem contributes to the discovery or interpretation of knowledge significant to their field of study.
B. Graduates who fulfill the requirement through study abroad or field school will
demonstrate an understanding of a culture and/or region distinct from their own and an
appreciation of the possibilities for academic inquiry and application afforded by the
specific off-campus setting.

C. Graduates who fulfill the requirement through service-learning will demonstrate the
ability to identify a community need and strategies for addressing it through mutual
learning, critical analysis, reflection, and collaboration with a community partner.

D. Graduates who fulfill the requirement through an internship will demonstrate how
specific methods related to their field of study through supervised work in a professional or
organizational setting are used to complete progress on a specific goal.

E. Graduates who fulfill the requirement through other approved experiences will have
articulated, implemented, and reflected on a substantive application of their academic
foundations to a real-world setting and/or challenge.

4. Process for school and college implementation plans

A. Using the learning outcomes stated above, each school and college shall submit an
implementation plan detailing how students will satisfy the experiential learning
requirement.

   1. When courses are used to satisfy the requirement, a list of the specific courses must
   be included in the implementation plan.

   2. When extracurricular activities are used to satisfy the requirement, students will be
   required to provide a substantive written document reflecting on how their experiences
   fulfill the learning outcomes. This document must be reviewed and passed as
   satisfactory by the Experiential Learning Certification Officer for the unit (see below), or
   by an appropriate faculty member designated by the Certification Officer.

B. Each school and college will designate a person who will function as the Experiential
Learning Certification Officer and will have responsibility for certifying that students have
satisfied the requirement prior to graduation. The Banner system will facilitate
documentation and certification of the fulfillment of the requirement.

C. Deans of schools and colleges shall have authority to approve exceptions for students
who make a compelling case for having met the spirit of the requirement through means
other than those specified in the school or college’s implementation plan.

D. Proposals to establish or change implementation plans should be submitted by each
undergraduate-serving school and college to the Office of the Senior Vice President for
Academic Affairs and Provost for consideration by the University Curriculum Committee.
The proposal will be sent to the University Curriculum Committee for information and
reviewed by a standing subcommittee of the University Curriculum Committee. The
subcommittee will evaluate the proposal to ensure that it conforms to this policy and is
consistent with Board of Regents policy. The subcommittee will have the authority to
approve proposals on behalf of the University Curriculum Committee. Any issues
unresolved by the subcommittee will be reviewed by the University Curriculum Committee.
E. Affirmative recommendations of the University Curriculum Committee will be forwarded to the Senior Vice President for Academic Affairs and Provost for final review.

F. All approved new or revised implementation plans will become effective subsequent to appearing in the Bulletin.
